

CODING

This week we have been learning about coding as part of the Digital Technologies curriculum.

Classes participated in an 'Hour of Code' where they had lots of fun exploring the different programs available. It has been great to see the students using many of the Habits of Mind while coding, such as Thinking Flexibly, Persisting and Creating, Imagining and Innovating.

Year 5 will continue to investigate how coding is used to create games, Binary numbers and 'if / then' statements.
